# Power Tools for Tableau
Server

## Monitor & Troubleshoot the Health of Tableau Server

Power Tools for Tableau: Server provides the most comprehensive look at the health of Tableau Server. You can now sift through all the noise and target exactly what is causing slow load times, extract failures and other critical server issues.

The success of an analytics practice hinges on great Tableau Server performance, but it can be challenging to wrap your arms around the most critical factors affecting performance. Power Tools: Server pulls these factors together into dashboards that contrast all of the key hardware and software elements.

Using these insights, you'll be able to give Tableau Server the proper care and maintenance that it needs to thrive in your organization:

+ Gain insights for spikes in activity/usage
+ Find out which workbooks consistently have the slowest load times
+ Monitor CPU usage, disk space I/O, network and concurrent users

+ Identify which extracts take the longest to refresh and which are failing to refresh
+ View trends and usage statistics across a historical timeline
+ Drill down to views and queries that are causing performance issues
+ Set customized email alerts for when problems occur

Pricing:

Annual Subscription (unlimited users):

$10,000 for initial 8 core Tableau Server
$2,500 for each additional 8 core
